Organisation of production of a tin stopper with a plastic ring of the type “ring pull”

Full Description

The project aims at creating in the Republic of Belarus a competitive production of a wide range of corking products in order to satisfy an increasing demand for the said products on the home market and to saturate the markets of the CIS countries with them

Participating Organisations and their Role

The joint venture “UNIBOX” is a limited liability company, Selitsky Street 9B, 220075, the city of Minsk, the Republic of Belarus, tel. numbers: + 375 17 299 67 56, + 375 17 244 94 41, e-mail address: unibox@unibox.by, www. unibox.by

Contact Telephone

+375 17 299 67 56

Preconditions/History/Joint Programme/Associated or Similar Projects

At present the joint venture “UNIBOX Ltd” produces a various assortment of stoppers to cork alcohol-free beer and mildly alcoholic drinks. However, many consumers in the Russian Federation, as well as some Belarusian enterprises prefer the stopper with a ring, considering it to be more convenient and, consequently, more attractive to buyers. Taking into account a reliable standing of the joint venture “UNIBOX Ltd” performing in the capacity of a supplier of a wide assortment of a high-quality corking production, some transnational beer corporations have addressed it with an offer to launch production of the stoppers in question to meet the demand for them. In monetary terms the already existing demand for the stopper with a “ring pull” in the Russian market is estimated at 8.5 mln EURO a year and is constantly increasing

Organisation of production of sanitary-hygienic and other disposable products

Full Description

The project aims at creating enterprises in the Republic of Belarus which will be producing a wide assortment of sanitary-hygienic and medical products to satisfy an ever-increasing demand for them in the home market. These products include different-age diapers, female hygienic packages, tampons and linings, hygienic wadded sticks, balls and disks, humidifying hygienic napkins and other wiping materials, disposable napkins, disposable bed-sheets, hygienic obstetric sets, hygienic handkerchiefs, etc.

Participating Organisations and their Role

The state organisation “The Administration of the Free Economic zone “Minsk”, Partisanski Avenue 12, 220070, the city of Minsk, the Republic of Belarus, tel. numbers: + 375 17 227 46 96, +375 17 214 54 38, e-mail address: info@fezminsk.by, www. fezminsk.by

Preconditions/History/Joint Programme/Associated or Similar Projects

At present the assortment of similar products produced in Belarus is narrow and the volumes are insignificant (female hygienic linings). The demand for sanitary-hygienic products in different health care establishments is met due to import deliveries. In monetary terms the already existing demand for the products of the specified type in the domestic market is estimated at about 30 mln USD a year and is constantly increasing

+375 17 203 17 51

Preconditions/History/Joint Programme/Associated or Similar Projects

According to Paragraph 5 of Decree No. 165 of the President of the Republic of Belarus dated 23rd April, 2003 it was entrusted to the Council of Ministers of the

Republic of Belarus to elaborate and to put into practice projects of stage-by-stage reconstruction, modernisation and moving out beyond the territory of the city of Minsk those industrial enterprises which adversely influence the city environment. The above enterprises are situated in the central historical part of the city of Minsk, right in its key zone. In accordance with the classification of the harmful effects such enterprises produce, both of them belong to class V. Following the General Plan of the city Minsk, bakery No. 1 (the city of Minsk, Rakovskay Street 25) and bakery No. 2 (the city of Minsk, Kropotkin Street 33) are to be moved out of Minsk by 2010 as non-consistent with the city regulation and are subject to changing the way their production capacities are used.

The production capacity of bakery No. 1 equals 75 tons a day, while that of bakery No. 2 amounts to 56.7 tons a day.

The mechanical-repair plant produces non-standard equipment used in baking of bread. It supplies complete equipment alongside with ensuring equipment operational development, installation, and adjustment, and is engaged in repairing equipment of all the seven bakeries located in the city of Minsk. The manufacturing divisions of the plant in question (the MRP) render services in metal working and woodworking.

At present the number of the people on the three enterprises' payroll makes 1041.

The main production facilities of bakery No. 1 are situated in a building belonging to the XIX century, termed a historical-architectural monument. The building locating the main production facilities of bakery No. 2 is also a historical-architectural monument. Moreover, these production facilities themselves are unique as they help preserve the old Belarusian traditions of baking bread. The said buildings are under protection of the state, and are not, therefore, subject to being pulled down.

Within the framework of the programme of moving out the enterprises of the municipal unitary enterprise "Minskchlebprom" of the central part of the city of Minsk it is planned:

- to build a new bakery producing various bakery products in the amount of 100 tons a day

- to build a mechanical-repair plant

Reconstruction of the workshop floorspace of the Republican unitary research-and-production enterprise "Dialek"

Full Description

The project aims at producing ampuled production, liquid lyophilized production, eye drops, tablets, suppositories and capsules equal of the world standards

Participating Organisations and their Role

1) The Republican unitary research-and-production enterprise "Dialek", tel./fax number: + 375 17 222 92 18, e-mail address: dialek@infonet.by

2) The concern "Belbiopharm", Varvashenya Street 17, 220029, the city of Minsk, the Republic of Belarus, tel. number: + 375 17 289 34 03

Contact Telephone

+375 17 219 06 41

Preconditions/History/Joint Programme/Associated or Similar Projects

The investment project is realised in conformity with the tendencies which have recently come into force in the pharmaceutical industry considered to be one of the most profitable and dynamically developing branches of economy. The Republican unitary research-and-production enterprise "Dialek" was set up in 1965 on the basis of the manufacturing division of the Belarusian Scientific Research Institute of Epidemiology and Microbiology of the Health Care Department of the Republic of Belarus. The overall number of employees is 200. One of the structural components of the enterprise is its research-and-development centre (R&D). The unique character of the Republican unitary research-and-production enterprise "Dialek" manifests itself in a well-established full cycle production comprising a whole range of activities from a scientific idea initiation to the launch of finished medical products, their testing, registration and delivery to the domestic markets and those of the neighbouring states. The enterprise in question is part of the Belarusian state concern "Belbiopharm". The project execution will result in producing 40 medical items fully conformed to the GMP requirements. It is estimated that the production capacities now being created will be reinforced by the already existing sales markets. In case there appears an investor keen to invest in the project and/or a financing source outshapes itself, the said investment offer will be supported by the detailed business plan

Organisation of production of the coldproof system "Isofaçade" aimed at winterizing the external walls of buildings

Full Description

"Isofaçade" is a natural two-layer polyurethane composition, serving as a warmth-preserving material and a high-quality clinker. It is a new domestically developed system serving the warmth-preserving purpose and is distinguished by the use of highly durable finishing materials and a considerably improved architectural-

decorative quality. “Isofaçade” is a warm, energy-saving construction that corresponds to the current heat insulation requirements (the heat-saving index amounts to 40 %). “Isofaçade” is intended for facing old buildings as well as prefabricated houses, simultaneously ensuring heat and sound insulation. “Isofaçade” is helpful in carrying out partial repair of buildings, when it is necessary to patch up available cracks and plaster defects. The system in question will also allow application of various design decisions

Participating Organisations and their Role

1) The open joint-stock company “Minsk Building Materials Plant”, J.Mavr Street 47, 220015, the city of Minsk, the Republic of Belarus, tel. numbers: + 375 17 251 91 33, +375 17 251 93 12

2) The Republican unitary enterprise “The Institute NIPTIS”, tel. number: + 375 17 263 52 57

3) The Ministry of Architecture and Construction of the Republic of Belarus, Mjasnikov Street 39, 220048, the city of Minsk, the Republic of Belarus, tel. number: + 375 17 227 85 21

Preconditions/History/Joint Programme/Associated or Similar Projects

The market situation both in the Republic of Belarus and in the Russian Federation is favourable enough for producing “Isofaçade” at a persistently high level. In Belarus alone 200 million cubic metres of habitation have been built following the norms of heat-shielding now considered to be entirely out-of-date, needing, therefore, warmth-preserving rehabilitation. Systems, analogues with “Isofaçade”, are not produced either in Belarus, or in the CIS countries, though similar production of isoclinkers is mastered in Germany and Canada.

Creation of the tourist historical-cultural memorial “The Crossing” in the village of Studenka, the Borisov district, the Minsk region, the Republic of Belarus

Full Description

The project aims at:

- attracting the public's attention to the historical-cultural heredity and natural resources on the territory of the Borisov district within the location of the villages of Studenka, Brili, Veselovka, and taking measures to reserve and multiply them
- attracting investments for developing tourism within the said territory
- activating tourism in the Borisov district and making a sounder profit from it
- creating new jobs
- raising the living standards of the local population

Creation of the Centre of interpretation is seen as the major result of the project realization. The above Centre is viewed as a compact territorial system, which takes advantage of a considerable number of historical and cultural monuments located there, and what is more important, well-preserved, and, therefore, attractive for tourists, natural resources. The Centre will serve the purpose of promoting and activating tourist activities the choice of which will depend on the character of tourism resources. The construction of the Centre will entail the development of a new sales zone and will lay foundation of the creation of a system of consumer service and a whole range of cultural amenities which will make it possible to provide for a maximum package of services and to arrange for showing around the local places of interest and to explore the tourist itineraries within the newly-founded Berezinski tourist area

Preconditions/History/Joint Programme/Associated or Similar Projects

The existing system of dealing with waste consists in its burial on the range of solid domestic waste (SDW) in the village of Dubei which has already exhausted itself. The range method of SDW neutralisation is technologically simple, though demands the use of vast ground areas, considerable capital investments, large operational and transport expenses. Besides, the range is a source of unpleasant smell, despite hydro protection methods employed, and a higher risk of pollution of underground waters with poisonous filtrates. Weight account of SDW is not carried out on the range. The town badly needs a new sorting out/ranging complex, answering modern technological standards and considering local conditions and landscape-hydrological features of the town

Technical reequipping and production modernisation of the open joint-stock company “The Slutsky Brewery”

Full Description

The project is initiated by the open joint-stock company “The Slutsky Brewery”.

Its economic activities are aimed at producing soft drinks, mineral water, strong drinks from natural, of superior quality and ecologically pure raw materials following original recipes.

Investments will be primarily used for technically reequipping the bottling site, the filtration branch and the auxiliary production (the ammonia-compressor shop). As a result, while the production capacities will remain the same (1.97 million decalitres a year) the quality of the beer will improve, its firmness will be raised and the packing design will become more attractive through using a three-

position label. All this taken together will make it possible to produce competitive beer
