Holding Company "Tatarstan Sote"

## Oil Production

## **ОАО "Татнефт"**

Open-End Joint Stock Company "Tatneft" holds a firm place among the leading oil companies of Russia, ranking fifth in terms of annual production. It accounts for over 8 per cent of all crude oil extracted in Russia. In the world oil business, ОАО "Tatneft" ranks 32nd in the production output and 18th in oil reserves.

Recent years saw territorial expansion of the company towards oil resources development, exports of advanced technologies and services. Business contacts and economic cooperation agreements link ОАО "Tatneft" to companies of 20 countries.

ОАО "Tatneft" has strong industrial, technical, and intellectual potential. The company is recognised in Russia's oil business circles as a hi-tech, state-of-the-art enterprise. Technologies developed in ОАО "Tatneft" have received wide acceptance from CIS regions. Foreign oil companies also show much interest in these technologies. The know-how of "Tatneft" features resource saving, economic benefits and environmental safety.

### **Products:**

Crude oil

Gas

Long distillates of light hydrocarbons

**Shafagat F. Takhautdinov**

**Director General**

Address: 75, Lenin St., Almetyevsk, Republic of Tatarstan, Russia, 423400

Phone: +7 (8553) 255-856

Fax: +7 (8553) 256-865

URL: [www.tatneft.ru](http://www.tatneft.ru)

E-mail: [tnr@tatneft.ru](mailto:tnr@tatneft.ru)

## Chemical, Petrochemical Industries

## **ОАО "Kazanorgsintez"**

Open-End Joint Stock Company "Kazanorgsintez" holds the lead in production of plastics, gas PE pipes, synthetic liquid coolants, phenol, acetone, and chemical reagents for crude oil production and natural gas dewatering; a total of 170 chemical products are manufactured. Some 25 per cent of output are exported. All products meet the standards established by state technical committees, and 14 basic products were certified to comply with EU requirements.

As of today, ОАО "Kazanorgsintez" owns Russia's largest facilities for production of both high-pressure and low-pressure polyethylene. The bulk of polyethylene is delivered to enterprises of cable industry, building industry, manufacturers of plastic components and consumer goods, packing materials, insulating films, and gas pipes.

Polyethylene is exported to over 30 countries of Europe and Asia, including Hungary, Finland, Austria, Germany, and China.

### **Products:**

Acetone

Propylene

Butyl cellosolve

Monoethylene glycol

Diethylene glycol

Low-density polyethylene

High-density polyethylene

Synthetic phenol

Ethylene

Plastics and synthetic resins

Thermoplastic pipes and parts of pipelines

**Nail Kh. Yusupov**

**Director General**

Address: 101, Belomorskaya St., Kazan, Republic of Tatarstan, Russia, 420051

Phone: +7 (8432) 43-71-33, 49-89-87

Fax: +7 (8432) 43-22-23, 43-71-41

URL: [www.kazanorgsintez.ru](http://www.kazanorgsintez.ru)

E-mail: [market@kos.ru](mailto:market@kos.ru)

## **ОАО "Sevilen"**

Main activity of Open-End Joint Stock Company "Sevilen" " is the production of low-density polyethylene with equipment purchased from Zalgitter (Germany). Production facilities were commissioned in December 1965.

The facilities for production of low-density polyethylene were reconstructed several times.

Products of ОАО "Sevilen" are in stable demand in Russia and the CIS countries, as well as in China, Hungary, Iran and other countries. Today the company cooperates with such large Russian enterprises as the Almet'yevsk Pipe Plant, Moscow Pipe-Procurement Combine, Volzhsky Motor Works (VAZ), etc.

### **Products:**

Low-density polyethylene

Ethylene-vinyl acetate copolymers (Sevilen)

Polyethylene and Sevilen films

Glue PVAD

Polyethylene and Sevilen pipes

PE containers of 5 litre and 50 litre

**Nikolai F. Zaitsev**

**Director General**

Address: 420051, Kazan, Belomorskaya St., Kazan, Republic of Tatarstan, Russia

Phone/fax: +7 (8432) 45-00-62

URL: [www.sevilen.ru](http://www.sevilen.ru)

E-mail: [sevilen@bancorp.ru](mailto:sevilen@bancorp.ru)

## **ОАО "Kazan Plant of Synthetic Rubber"**

Open-End Joint Stock Company “Kazan Plant of Synthetic Rubber” is one of the largest chemical companies in the Republic of Tatarstan manufacturing special-purpose rubbers and products on their basis. Main lines of production are Thiokol, silicone, urethane, latex, SKB rubber, sealants, and compounds.

The company manufactures today over 160 items including some 80 rubbers, over 30 types of Thiokol and silicone sealants, and a broad range of various products used in medical industry, instrument-making, electrical industry, aircraft construction, space-system engineering, motor industry, food processing, shoe industry, housing and industrial construction.

The company has good scientific and technological potential and highly qualified personnel.

### **Products:**

#### Silicone production

- Silicone rubbers (SKT, SKTNF, SKTV-1, SKTN, SKTFV-803, SKTE)

- Silicone rubber compounds (K-1520, 14r-15, 14r-2)

- Organic-silicon sealants

- Organic-silicon compounds

- Heat-resistant adhesive tapes

- Electric insulating rubberised fibreglass fabric

#### Urethane production

- Urethane rubbers

- Urethane prepolymers

- Urethane polymer UK-1

- Polyesters

#### Rubbers SKB, SKB-RShch

#### Thiokol production

- Thiokol

- Polymer TPM-2

- Thiokol sealants

#### Building materials production

- Mastic compounds

Roofing covers

Drying oil SKB

Facade paint

Alkyd varnish

Production:

Latex

Copolymer sulphur

Motor liquid coolants

Noise-insulating material

Spark-protective material

**Felix Palyutin**

**Director General**

Address: 1, Lebedev St., Kazan, Republic of Tatarstan, Russia, 420054

E-mail: [info@prigend.ru](mailto:info@prigend.ru)

## **OAO Holding Company "Tasma"**

Open-End Joint Stock "Holding Company Tasma" is a leading enterprise in chemical-photographic industry of Russia.

With its unique technologies and necessary production facilities, the company manufactures a broad range of X-Ray medical and photofluorographic films, as well as technical films, photo- and polygraphic films, aerospace materials, various lavesan and triacetate films, Na-carboximethylcellulose that are used in oil- and gas-extracting and other sectors of the national economy. The company is constantly developing and introducing new products and technologies.

### **Products:**

Medical film

Medical photofluorographic film (Russian Federation)

Dental film RZ-1

Industrial radiographic film RT-1, RT-K

Photo-technical films FT-41P

Magnetic tape

Note-paper

Lavesan folders

Glue KMC

Compact cassettes

Planar photographic film

Aerial film

SPF-VShch 2-50

Mikrat (isobutane), black-and-white

Lavesan base

Secondary resin

Adhesive tape LT

Acetyl-phthalate cellulose

Film FN, black-and-white, Super-100 in cassette

**Damir Sh. Muratov**

**Director General**

Address: 100, Vosstaniya St., Kazan, Republic of Tatarstan, Russia, 420095

Phone: +7 (8432) 42-62-32, 42-24-36

Fax: +7 (8432) 42-24-36, 42-28-52

## **ОАО "Chemical Plant n.a. L.Ya. Karpov"**

Open-End Joint Stock Company "Chemical Plant n.a. L.Ya. Karpov" is a Russia's oldest chemical enterprise established in 1868.

Karpov Chemical Plant produces inorganic chemical products for many uses in various industries of the national economy. The products of the company are well-known in more than two hundred cities of Russia and the CIS, as well as in many European and Asian countries.

The list of products manufactured by the enterprise include chemicals for laboratories, pharmaceutical industry, medicine and veterinary, microelectronics, glass-making, tanning industry, textiles, cinematography and photography, for production of acid cells and high-quality paper, and for the use as micro-fertilisers in gardening. The company's products are used in metallurgy for making high-quality aluminium alloys, in chemical industry, and as carrying agents for catalysts, dehumidifiers, and air dryers.

The plant today is creating new facilities for production of reagents.

### **Products:**

Aluminium sulphate, technical grade, brand B (alumina sulphate), refined

Barium carbonate, technical grade, brands 1 and 2

Barium carbonate, technical grade, brands A and B

Barium carbonate, technical grade, granulated, brand A

Barium hydroxide, "Pure", "Pro Analyti", and "Chemically Pure" quality, octahydrated

Barium hydroxide, technical grade

Barium hydroxide, technical grade, brands 1 and 2

Barium sulphate for batteries

Barium sulphate for paper coating, brands A and B

Barium sulphate, "Pure" quality

Barium sulphate, pharmaceutical grade

Calcium chloride, dihydrated

Calcium chloride, pharmaceutical grade

Calcium hydroxide, technical grade

Magnesium sulphate, "Pure", "Pro Analyti", and "Chemically Pure" quality, heptahydrated

Silica gel, indicator

Silica gel, technical grade, brands KSKG, KSMG, ShSMG

Sodium bisulphite, technical grade, brand B

Sodium metabisulfite, brands 1 and 2

Sodium sulphate, "Pure", "Pro Analyti", and "Chemically Pure" quality, decahydrated

Sodium sulphate, "Pure", "Pro Analyti", and "Chemically Pure" quality

Sodium sulphate, technical grade

Sodium sulphite, "Pure", "Pro Analyti", and "Chemically Pure" quality

Sodium sulphite, photographic grade, anhydrous

Sodium thiosulphate, "Pure" and "Pro Analyti" quality, pentahydrated

Sodium thiosulphate, crystalline

Sodium thiosulphate, pharmaceutical grade

Sodium thiosulphate, photographic grade, crystalline

Sodium thiosulphate, technical grade, crystalline

**Damir R. Shamsin**

**Director General**

Address: 2, Pionerskaya St., Mendeleyevsk, Republic of Tatarstan, Russia, 423650

Phone: +7 (85549) 2-12-51, 2-14-48

Fax: +7 (85549) 2-12-51

URL: [www.karpov.tbit.ru](http://www.karpov.tbit.ru)

E-mail: [market@karpov.tbit.ru](mailto:market@karpov.tbit.ru)

## **ОАО "Татазот"**

Open-end Joint Stock Company "Tatazot" is the only manufacturer of nitrogen fertilisers in the Republic of Tatarstan. Its annual output is 450,000 tonnes of ammonium nitrate. The enterprise has access roads and railroads, and from the nearby river port the products can be delivered to the countries of Europe, Asia and Africa by river-marine vessels.

Current plans of the enterprise include construction of ammonia production complex.

### **Products:**

Ammonium nitrate

Regular nitric acid

Industrial oxygen gas and liquid

**Gvidon A. Miribyan**

**Director General**

Address: P.O. Box 83, Mendeleyevsk, Republic of Tatarstan, Russia, 423640

Phone: +7 (85549) 2-10-35, 2-10-76

Fax: +7 (85549) 2-43-29, 2-16-00

E-mail: [tatazot@rambler.ru](mailto:tatazot@rambler.ru)

## **FGUP “FNPC GK NPP n.a. V.I. Lenin”**

The enterprise dates from the eighteenth century, when the gunpowder factory was built under the decree of the Empress Catherine the Great. The gunpowder that has brought reputation and honour to the factory still remains its major product.

Federal State Unitary Enterprise (FGUP) “Federal Scientific and Production Centre State Enterprise Scientific and Production Enterprise n.a. V.L. Lenin” today is the large manufacturer of chemical and mechanical engineering products, carrying out its own research and development work. Leading-edge technologies and long term experience contributed to the establishment of production, on a level with the highest world standards, of quick-drying nitrolacquers and nitroenamels, organic solvents, paintwork and mastic colloxyllins, fibrefills, powdered cellulose, and hunting powder. NPP n.a. V.I. Lenin holds the lead in manufacturing the products from high-silicon cast iron (ferrosilicon), indispensable when pumping the solutions of acids, salts, and alkalis.

### **Products:**

Gunpowder (sporting and hunting)

Electrodes

Joint filler

Paintwork materials

Glue BF

Soft synthetic leather (MSK)

Plasticised and unplasticised nitro-cellulose

Solvents

**Sergei E. Mezheritsky**

**Director General**

Address: 14 , First of May St., Kazan, Republic of Tatarstan, Russia, 420032

Phone: +7 (8432) 55-45-73

Fax: + (8432) 55-40-14

## **ОАО "Nizhnekamskneftekhim"**

Open-End Joint Stock Company "Nizhnekamskneftekhim" is one of the largest producers and exporters of petrochemical products in Russia.

Today the range of just commodity products includes over 100 items. Facilities of basic products have ISO 9002 quality certificates.

The share of ОАО "Nizhnekamskneftekhim" in the total Russian output is as follows: ethylene – 22.4 %, propylene – 21.1 %, butyl rubber – 60.3 % (7 % of the total output in the world), synthetic isoprene rubber – 43.5 % (27 % of the total output in the world), styrene – 64.33 %, monoethylene glycol – 33.7 %, propylene oxide – 100 %, polyethers – 100 %, neonols – 100 %, linear alpha-olefins – 100 %, propylene trimers and tetramers – 100 %.

In 2002, ОАО "Nizhnekamskneftekhim" manufactured products for 615.3 million US dollars.

Among partners of ОАО "Nizhnekamskneftekhim" there are such companies as Goodyear (USA), Bridgestone (Japan), Michelin (France), Pirelli (Italy), Continental (Germany), BASF (Germany), Dow Chemical (USA), Bayer AG (Germany), ABB Lummus (USA), Ballestra Spa (Italy), Lurgi (Germany), Mitsui (Japan), Hyundai Corporation (Korea), Akzo Nobel (Sweden), Nalko/Exxon (USA).

### **Products:**

Synthetic isoprene rubber SKI-3

Diethylene glycol

Ethylbenzene, industrial

Ethylcellosolve, industrial

Ethylene glycol

Ethylcarbitol, industrial

Polyether Polyol "Laprol 3603-2-12"

Polyether Polyol "Laprol 5003-2B-10"

Ethylene oxide  
Synthetic isoprene rubber SKI-3S  
Synthetic isoprene rubber SKI-3Sh  
Styrene  
Triethylene glycol, industrial  
Laprol-503B  
Polyether Polyol "Laprol 373"  
Polyether Polyol "Lapramol 294"  
Propylene  
Propylene oxide  
Propylene terpolymers  
Isoprene  
Methyl-tert-butyl ether (MTBE)  
Methyl-tert-amyl ether (TAME)  
Synthetic rubber waste  
Benzene distillation residues  
Acetaldehyde fraction  
Dust suppressors  
Detergent "KAMA"  
Scour for ware washing "AFOL"  
Clarified dehumidifier  
Propylene tetramers  
Nonylphenol Ethoxylate "Neonol AF 9-6"  
Nonylphenol Ethoxylate "Neonol AF 9-9"  
Nonylphenol Ethoxylate "Neonols AF 9-10, AF 9-12"  
Nonylphenol Ethoxylate "Neonols ABF-10, ABF-12"  
Nonylphenol Ethoxylate "Neonols AF Alpha-12, Alpha-14"  
Nonylphenol  
Diesel fuel  
Akvabor  
Mazut M-40  
Mazut M-100  
1-Hexene

1-Octene  
1-Decene  
C8-C10 linear alpha-olefins  
C12-C14 linear alpha-olefins  
C16-C18 linear alpha-olefins  
C20-C26 linear alpha-olefins  
Isobutylene  
Butadiene 1,3  
Liquefied hydrocarbon gases  
Hexane-Heptane hydrocarbon fraction  
Polyalkyl benzene fraction  
Liquid I-M  
Antifreeze TOSOL-A40M  
Alcohol ester solvent  
Liquid detergent "SANOL"

**Vladimir M. Busygin**

## **ОАО "Nizhnekamskshina"**

Open-End Joint Stock Company "Nizhnekamskshina" is the Russia's largest enterprise of tyre industry. Practically every third tyre manufactured in Russia comes from Nizhnekamsk. The company was established in 1971 as the basic enterprise for production of tyres for giants of the domestic automotive industry: VAZ and KamAZ, as well as for saturation of the secondary market of tyres for passenger cars, trucks and agricultural machinery.

ОАО "Nizhnekamskshina" is capable of producing 150 types and sizes of tyres for any operational conditions. The company never ceases to retool the tyre production, thus expanding the range and improving the quality of its products featuring high consumer properties.

One of the promising areas of the company's activity is mastering and further developing the production of all-steel tyres.

The efficiency of quality control system has been certified by ISO 9001 Certificate

### **Products:**

Tyres for trucks and passenger cars

**Radik S. Ilyasov**

**Director General**

Address: Promzona 10, Nizhnekamsk, Republic of Tatarstan, Russia, 423570

Phone: +7 (8555) 37-23-33; 34-84-31

## **OAo "Khiton"**

Open-End Joint Stock Company "Khiton" is one of the Russia's largest manufacturers of household chemical goods. The products of the enterprise are developed by forces of own research centre.

OAo "Khiton" was one of the first spray manufacturers to discard the ozone-destroying chladones by mastering the technology based on the purified hydrocarbon gas. For the first time in Russia, the company has developed and introduced an aerosol manufacturing technique that uses compressed air as a propellant. It has also mastered the production of liquid and aerosol automotive cosmetics.

OAo "Khiton" is active in co-operation with foreign countries, applying raw components and fragrances from reputable companies based in Germany, Greece, Switzerland, and Japan.

Commodities bearing the trademark of OAo "Khiton" were repeatedly honoured with medals and diplomas of domestic and international exhibitions.

### **Products:**

#### Household chemical goods

- Body deodorants
- Hair sprays
- Insecticides
- Repellent (against mosquitoes)
- Glass cleaner
- Antistatic
- Air fresheners

#### Synthetic detergents

- Multipurpose detergent paste
- Foaming detergent
- Shampoos

#### Paintwork products

- Enamels

Ground works

Auto cosmetics

## **ОАО "Nefis-Cosmetics"**

Kazan Chemical Works named after M. Vakhitov (ОАО "Nefis-Cosmetics") is one of the oldest and largest Russian enterprises manufacturing a broad range of household chemical goods and products for many industrial uses.

All finished products meet international standards and environmental requirements. Production under best domestic and foreign technologies uses high-quality supplies and raw materials that contain only natural components, special additives, and a broad spectrum of fragrances.

A wide variety of products manufactured by ОАО "Nefis-Cosmetics" are exported to the CIS and Baltic states, as well as to the Asian-Pacific countries. With an aim to expand its sales ОАО "Nefis-Cosmetics" is creating a dealer network in the Russian Federation and foreign countries.

### **Products:**

Synthetic detergents

Toilet and laundry soap

Stearic acid

Glyceric acid

Salomas (hydrogenated fat)

Cleansers

Household decorative candles

Lubricating-refrigerating liquid

Shampoo

**Dmitry N. Kharitonov**

**Director General**

Address: 152, Toukay St., Kazan, Republic of Tatarstan, Russia, 420022

Phone: +7 (8432) 64-28-52

## **ZAO "Kvart"**

Close-end Joint Stock Company "Kvart" is a large manufacturer of industrial rubber products for all branches of economy. Nowadays, "Kvart" is the only company in Russia manufacturing unique types of products: radiosonde and pilot-balloon shells, deep-drilling hoses, brake hoses, corrosion-resistant hoses for oil production, products from dynamic thermoplastic elastomers.

Its qualified personnel, up-to-date equipment, and advanced technologies make the company capable of taking proper account of specific orders and ensure good competitive position in the global market. In 1992, "Kvart" was awarded the international prize and diploma of "Golden Arch of Europe" for high quality of its products.

ZAO "Kvart" supplies its products to 32 countries worldwide. Among them: Germany, Canada, South Korea, Bulgaria, Cuba, Pakistan, India, etc.

At present, the company develops new economic forms of development with participation of foreign partners.

### **Products:**

Crude rubbers

- Hose items, 1,500 types and sizes

- Moulded rubber articles of any sizes

- Unmoulded articles in the form of vulcanite profiles

- Rubber compounds, 150 brands

- Industrial rubber plates

Glues

Sealant

Consumer goods

## Aircraft Industry

## **ОАО "Kazan Helicopters"**

Open-End Joint Stock Company "Kazan Helicopters" is the largest manufacturer of MI helicopters. ОАО "Kazan Helicopters" is mostly well known as a manufacturer of MI-8 helicopters. Its MI-17 helicopters based on the world-famous MI-8s of the Chief Designer M.L. Mil have given an excellent account of themselves in over 50 countries worldwide.

In recent years, ОАО "Kazan Helicopters" is involved in modernising the helicopter with new model named MI-17MD. At the same time, underway is the design and manufacturing of light helicopter "Ansat" of 3.3 tonnes in takeoff weight.

### **Products:**

Helicopters of military, transport, and passenger versions (MI-8, MI-8 MT, MI-14, MI-17-18)

Light helicopter "Ansat"

Aircraft materials

**Alexandr P. Lavrentev**

**Director General**

Address: 14, Tetsevsкая St., Kazan, Republic of Tatarstan, Russia, 420085

## **FGUP Kazan Aircraft Production Association n.a. S.P. Gorbunov**

Federal State Unitary Enterprise Kazan Aircraft Production Association named after S.P. Gorbunov (KAPO) is an outstanding Russian aircraft-building complex. Established in 1927, the plant and has always been in the forefront of mastering new types of military and passenger aircraft.

For over 70 years of its history, KAPO mastered the production of 34 types and modifications of aerospace products, a total of over 18,000 units. KAPO was the first in the world to start the production of jet airplanes: TU-104 with its 26 world records, intercontinental comfortable liners IL-62 and IL-62M - the latter being considered a leader of civil aviation for more than 30 years. Two last decades saw the production of the world's unique hypersonic bomber TU-22MZ and the pride of Russian strategic aviation, TU-160.

At present, the plant is engaged in the full-scale production of passenger airliner TU-214, a jet airplane intended for medium-distance airlines and successfully realising the up-to-date achievements of the Russian airspace technology. A scheduled work is underway to master new types of civil airplanes:

TU-330, a middle-class wide-body cargo aircraft, 35 tonnes of payload capacity, equipped with airtight cargo bay, built-in loading and floor level control systems;

TU-324, a new regional executive airplane intended for operation on the airlines up to 2800 km in length with 52 passengers on board.

### **Products:**

Special-purpose aircraft

Passenger airplanes (TU-214)

Aircraft spare parts

**Nail G. Khairullin**

**Director General**

## **OAO "Kazan Motor-Building Production Association"**

Open-End Joint Stock Company "Kazan Motor-Building Production Association" (OAO KMPO) - a largest enterprise of aircraft industry - enjoys over 65 years of experience in full-scale production, repair and maintenance of aircraft engines.

OAO KMPO manufactures virtually an entire spectrum of air-engine parts ranging from small ironware and fixtures to large-size moulded and welded bodies and long-length shafts.

In metallurgical production, the half-finished materials are made using advanced casting and stamping techniques followed by machining, chemical and thermal treatment.

The quality control system of OAO KMPO in production, repair, and maintenance of aircraft engines complies with GOST R ISO 9002; all relevant certificates are available.

### **Products:**

Aircraft equipment

Aircraft engines

Repair of engines for gas pumping units

Agricultural machinery

Hydromechanical gearboxes for city buses

## Mechanical Engineering and Metal Working

## **ОАО "Kazankompresormash"**

Open-End Joint Stock Company "Kazankompresormash" is a large Russian enterprise specialising in manufacturing, testing, commissioning, adjusting, and after-sales services of compressors and refrigerators based on screw-rotor and centrifugal compressors having various types of drives, manufacturing of individual components and spare parts, and repairs of compressor units including imported equipment. Under the licenses, it makes engineering diagnostics of pumping and compressor equipment whose standard service life has expired and issues reports on admissibility and conditions of its further operation.

ОАО "Kazankompresormash" manufactures a broad range of compressor equipment, either on the full scale or to individual orders.

Compressor machines under "ТАКТ" trademark are operated successfully in 40 countries of the world. Highly qualified personnel and strong up-to-date production facilities enable the plant to manufacture the most sophisticated compressor machinery.

### **Products:**

Compressor units:

- Centrifugal compressors and superchargers for a variety of process gases;

- Centrifugal compressors and superchargers of general use for inert gases and air;

- Centrifugal units with horizontal and vertical casing joints;

- Centrifugal units on the basis of multishaft compressors;

- Oil-flooded screw compressors for air and gases;

- Dry screw compressors for air and gases;

- Centrifugal superchargers of gas-compressor units;

- Expander-compressor units for gas processing;

- Freon and ammonia refrigerating units on the basis of helical screw compressors;

Air turbo-refrigerating units;  
Helical compressors for freon and ammonia refrigerating units;  
Removable settings for compressor stations.

## ОАО "KamAZ"

Open-End Joint Stock Company "KamAZ" is widely known in Russia and abroad. The enterprise is engaged in development, production, assembly and after-sales services of trucks and cars, diesel engines, parts, assemblies and components of motor vehicles, manufacturing of tools, machining attachments, tailored equipment, overhaul of motor vehicles power-generating sets and assemblies, production of iron, steel, and non-ferrous castings, forgings and stampings, as well as domestic and foreign trade, and other activities.

ОАО "KamAZ" Group today is a united industrial complex located in the city of Naberezhnye Chelny. It incorporates 9 large specialised plants employing all manufacturing process technologies of up-to-date mechanical engineering.

The preparatory complex of KamAZ include foundry, forge and frame pressing plants, each having independent legal status.

Machining and assembly complexes are represented by "KamAZ-Diesel", vehicle assembly plant, mechanical plant, "KamAZinstrumentpetsmash", compact car plant, and engine overhaul plant. These plants are also independent legal entities.

There are 6 more plants outside Naberezhnye Chelny - in Russia, Ukraine, and Kazakhstan. Trucks and diesel engines made by ОАО "KamAZ" can be found in more than 75 countries of the CIS, Asia, Africa, Europe, and Latin America. KamAZ heavy-duty trucks are operated under any road and climatic conditions: from the Far North to the tropics and from deserts to mountain terrain.

KamAZ trucks are participants and prize-winners of the most prestigious international rallies such as Paris-Dakar, Paris-Moscow-Beijing, and Dakar-Cairo. The team of KamAZ Motor Works won world championships for truck races several times.

Service network of some 180 service centres created by ОАО "KamAZ" covers Russia, the CIS, and foreign countries.

Apart from its main products, KamAZ manufactures trailers, compact cars, chassis for buses, castings, hot and cold forgings, welded assemblies, control instruments and devices, as well as a wide range of other products manufactured under diversification programme. Some of such products are sold for export.

In 2001, seven associated companies of KamAZ were recognised as complying with ISO 9002 standards and were granted the relevant certificates. The task was set to bring all major plants of OAO "KamAZ" to this international level of standards.

### **Products:**

#### Production trucks and chassis

Platform tractive units, load-carrying capacity: 3.5 – 11 tonnes

Tractive units, load-carrying capacity: 10 – 17 tonnes

Dump trucks, load-carrying capacity: 13– 20 tonnes

Chassis, admissible mass of superstructure with load: from 5 to 22 tonnes;

KamAZ-4911, sports version

#### Special machinery

For agroindustrial complex;

Road-building machinery;

For fuel and energy complex;

Municipal machinery;

Logging machinery;

Fire-extinguishing machinery;

Building machinery;

Vans

#### Buses

KamAZ, bus chassis;

PAZ buses on KamAZ chassis;

NEFAZ, city buses on KamAZ chassis;

NEFAZ, shuttle buses on KamAZ chassis

Tractors with KamAZ power units

KhTZ-16331

KamAZ KT-240K

Engines and power units

VAZ-11113 (“Oka”) compact cars

Auto spares

## *Divisions of OAO "KamAZ"*

### **OAO "Kamsky Foundry Plant"**

Open-End Joint Stock Company "Kamsky Foundry Plant" is incorporated into the Product Group "KamAZ – Metallurgy". It is one of the largest foundries not only in Russia and the CIS, but in the world as well. The plant incorporates a number of specialised facilities for production of grey, malleable, and high-duty cast iron, core-mould castings, non-ferrous, precision steel castings, as well as other auxiliary industrial facilities.

By decision of the certification audit authority, the quality control system of OAO "Kamsky Foundry Plant" has been recognised as complying with international standards ISO-9001 and GOST R ISO-9001-96. The certification audit was conducted by reputable certification authorities, TUV (Germany) and AAS "ASM-NAMI" (Moscow).

Manufacturing processes and the production on the whole are controlled by modern computer facilities. A considerable proportion of the equipment is unique among other plants of Russia and the CIS. The process technologies applied allow castings with close machining tolerances. The plant has extensive experience and strong potential of exports for the most exacting clients from Europe and the USA.

#### **Products:**

Cast components and spare parts for KamAZ motor vehicles and agricultural machinery

Cast-iron-, steel and non-ferrous castings

Brass and bronze pipe foundring

Cast steel shot

Stacking mouldings

Auxiliaries

Non-ferrous metal products

Steel products

Cast-iron products

Wedge valve

Small architectural forms

Municipal mouldings

## **OAo "Kamsky Forge Plant"**

With its three production buildings - stamping, preparatory, and auxiliary - the plant has facilities to produce 187,500 tonnes of forgings and hot stampings a year.

Manufacturing processes in the plant use the most advanced equipment and newest stamping techniques: hot stamping presses rated at up to 6000 ton-forces, cross-wedge rolling mills, integrated automatic lines for manufacturing of front-axle beams and crankshafts, hot-heading automatic machines, upsetting and swaging machines, and other equipment of home and foreign manufacture built in production lines.

Basic manufacturing operations are conducted on automatic and integrated mechanised lines with close machining tolerances. The equipment and technologies of the plant allow the production of hot-stamping blanks and forgings for all branches of national economy.

OAo "Kamsky Forge Plant" has certified its production and quality control system to comply with standards series ISO-9002.

### **Products:**

Hot-stamped forgings and blanks

**Igor Medvedev**

**Director General**

## **OAo "Kamsky Frame Pressing Plant"**

The plant is intended for production of the entire range of thin and thick sheet cold stampings and painted welded assemblies for trucks and cars and is rated at up to 130,000 truck sets and 75,000 compact car sets per year.

For stamping, welding and painting of products, the plant uses advanced and high-performance equipment arranged into automatic and mechanised production lines, slitting and shearing units.

The plant has good capabilities to perform any orders for designing and manufacturing of any dies and stampings, including especially complicated ones for deep drawing and bonding fixtures, within reasonable manufacturing time limits.

OAo "Kamsky Frame Pressing Plant" has certified its production and quality control system to comply with standards series ISO-9000.

### **Products:**

Cabs and frames for KamAZ motor vehicles

Bodies for "Oka" cars

Components of chassis joints, assemblies and platforms

Spare parts for motor vehicles

### **Damir Karimoullin**

## **ОАО "KamAZ-Diesel "**

Open-End Joint Stock Company "KamAZ-Diesel" is a modern plant manufacturing diesel engines, power units intended not only for trucks but also for buses, tractors, harvesters and boats, as well as for stationary power plants used in mines, grinding mills, farms, etc.

Plant facilities are completed with high-performance versatile equipment having high degree of automation and mechanisation, with forced tool changeover and active in-process and final monitoring of parts being manufactured. Leading machine-tool builders from the USA, Europe, CIS, and Russia took part in modernising plant facilities.

ОАО "KamAZ-Diesel" has certified its production and quality control system to comply with standards series ISO-9000.

### **Products:**

Engines for "KamAZ" vehicles

Diesel engines, power units, transmissions, hydrocylinders for trailers, turbocompressors for buses and tractors

Stationary power units for mines, mills, farms and other enterprises

Components for "KamAZ" vehicles

**Yevgeny Fedulov**

**Director General**

## **Motor Works**

The Motor Works is a finishing enterprise of "KamAZ". About two hundred models of ready vehicles leave its main and subordinate assembly lines. Apart from two main assembly lines, there is a separate conveyor string intended for assembly of new models and tailored vehicles where they are assembled on special workbenches mounted on air cushions.

Except for the assembly facilities, the Motor Works accommodates a large mechanical section for machining and assembly of main truck chassis parts and components rated at 75,000 assembly sets, as well as complete sets of chassis for buses. Basic manufacturing facilities feature high-production equipment of increased structural strength, high machining accuracy, and good cutting performance.

The Motor Works has certified its quality control system to comply with standards ISO-9001-94.

### **Products and services:**

“KamAZ” vehicles and related spare parts

Mechanoprocessing facilities for cutting and assembly of basic parts and units of chassis for trucks, and complete chassis sets for buses

Capital overhaul of “KamAZ” vehicles

### **Islimgarey Shigapov**

## **OAo "Compact Car Plant"**

The plant was founded for manufacturing and assembly of "Oka" compact cars. It is located in the detached production building of 250,000 square metres in floor space. OAO "CCP" ("ZMA") is closely integrated with divisions of OAO "KamAZ"; its working area accommodates machining and assembly facilities and plastics workshop, while "KamAZ" plants undertake stamping, welding, painting of bodies, and production of other components.

Machining and assembly facilities of OAO "CCP" are equipped with high-performance flexible manufacturing systems made by domestic and foreign companies.

OAo "Compact Car Plant" was granted the certificate stating the compliance of its quality control system with standards GOST R ISO-9002-96.

### **Products:**

VAZ-11113 ("Oka") passenger cars

Components for "Oka" and "KamAZ" vehicles

## **OA0 "Kamazinstrumentpetsmash"**

The plant's field of specialisation is production of various cutting, measuring, and auxiliary tools, as well as a variety of appliances and tooling both for automotive industry and for other sectors of mechanical engineering.

From the very beginning of its history, the plant has been exclusively focusing on the advanced processing techniques: profiling, diamond working, electrochemical and spark erosion machining, deposition of wear-resistant coatings, etc.

In 1990s, the plant mastered the production of new advanced types of tools with replaceable throwaway carbide inserts including those under the licenses purchased in Europe.

Products of the plant are profitably employed at the facilities of the leading companies of Italy, Germany, and the USA, who confirm their high opinion of the manufactured tools.

The quality control system of OAO "KamAZinstrumentpetsmash" complies with GOST R ISO 9002 and MS ISO 9002.

### **Products:**

Measuring tools

Metal-cutting tools

Auxiliary tools

Press tools

Accessories and tooling

Pneumatic tools

Steering booster

Pumps

Winches

Platforms

Refuse tippers

Tank trucks

Fire-engines

Bus chassis on the basis of “KamAZ” vehicle

## **ОАО "Kazan Gas Apparatus Plant - Vesta"**

Open-End Joint Stock Company "Kazan Gas Apparatus Plant - Vesta" was founded in 1958. Today, the plant is one of the Russia's largest manufacturers of gas ovens well known both in Tatarstan and outside it in other Russian regions and the CIS countries. For all years of its existence, the plant manufactured over 7 million gas ovens.

Infrared radiant burners of Vesta make are another widely popular product. The burners are used in construction, for heating of premises, food processing (grills, appliances for making shashlik and shaurma), and crankcase warm-up.

Over 90 % of components are of own manufacture, which enables the plant to reduce the cost of its products and control their quality. The plant is constantly working on the improvement of the design of its products.

Starting from 2000, "Kazan Gas Apparatus Plant - Vesta" is working in the international market.

### **Products:**

Stationary and portable gas cookers

Household four-burner gas ranges under "Idel" and "Vesta" trademarks

Two- and three-burner counter top gas fryers

Gas-operated infrared radiant burners

GIIV-3.65 "Unifitsirovannaya"

GII-1.85 "Zvezdochka"

Gas-operated equipment

Appliances for making shashlik and heating of premises

## **OAO "ALNAS"**

Open-End Joint Stock Company "Almetyevsk Plant for Submersible Electrical Pumps" is a large modern engineering enterprise. It was put into operation in 1978, but by now it has become the world's largest manufacturer of systems for crude oil extraction.

Every year, the enterprise puts into production several new types of submersible electrical centrifugal pumps while updating the pumps that are being manufactured. Underway is continuous search and use of new materials and structures; employed are the expertise and scientific potential of many Russian and foreign institutions.

The modern technology harnesses the best equipment from Russia, Germany, Denmark, Italy, and other countries.

The quality management standards currently applied at the plant set somewhat more stringent requirements than those imposed by the European standard ISO-9001.

The plant has an office in Moscow, associated companies in the Great Britain, Nizhnevartovsk (Russia), UAE, Hong Kong, and a broad distribution network. The products of the plant enjoy recognition in Canada, USA, Libya, Germany, Russia, Oman, and other countries.

### **Products:**

Submersible units for crude oil production

Electrical centrifugal pumps

Ventilated brake disks

Iron castings

Spare parts

### **Alexei Lukin**

## **ОАО "Almetyevsk Pipe Plant"**

Open-End Joint Stock Company "Almetyevsk Pipe Plant" is the largest Russian and CIS manufacturer of steel pipes with high-quality outer and inner coatings from 57 mm to 530 mm (inclusive) in diameter.

The plant was among the first in Russia to receive the Russian Gosstandart certificates of conformance for its products. For 35 years of its history, the Almetyevsk Pipe Plant supplied 9 million tonnes or over 350,000 kilometres of steel pipes to the markets of Russia, CIS and abroad, including 150,000 kilometres of the same with outer polyethylene coating. The partners of the plant are 6,000 enterprises from Russia, CIS, and foreign countries.

### **Products:**

Straight seam pipes, outside diameter from 10 mm to 220 mm and wall thickness of up to 7 mm;

Spiral seam pipes, outside diameter from 159 mm to 377 mm and wall thickness from 4 mm to 6 mm;

Pipes from 57 mm to 530 mm in diameter can be made with outer and inner coating at customer's option;

Return bends, nominal bore from 40 mm to 200 mm;

Polyethylene pipes, outside diameter from 12 mm to 75 mm;

Polyethylene film, width of 100, 150 and 200 microns, width of up to 3 m;

PE buckets and basins of various capacity.

## **FGUP PO "Plant n.a. Sergo - POZIS"**

Federal State Unitary Enterprise "Plant n.a. Sergo - POZIS" is one of the largest enterprises of the sector developing, manufacturing, and supplying military and civil products to domestic and foreign markets.

Founded in 1898 as the Paratsky Steel Works, "POZIS" today is among the top three domestic manufacturers of white goods.

Household and commercial refrigerators of "POZIS" are of stable consumer demand. The key to the company's success are the "Mir" and "Sviyaga" trademarks, well-known for almost half a century in Russia and abroad. Refrigerating equipment of "POZIS" has been mirroring all newest trends in design and meets the environmental safety requirements.

Production Association "Plant n.a. Sergo" is a leading enterprise of the country's defence complex; over a hundred years it has been engaged in production of ammunition. Beginning in 1996, it manufactures hunting cartridges (12, 16, and 20 calibre) and sporting cartridges (12 calibre) for smooth bore hunting and sporting guns.

"POZIS" manufactures, installs, and sells insulated truck bodies mountable on chassis of all domestic motor vehicles, either fibreglass or zinc-plated. The plant launched the production of insulated truck bodies and refrigerator bodies with cold accumulation system.

### **Products:**

Household refrigerators and freezers;

Medical equipment

Rotary tableting press

Refrigerator bodies for motor vehicles;

Hunting cartridges.

## **ОАО "Вакууммаш"**

Open-End Joint Stock Company "Вакууммаш" is the leader in production of vacuum equipment in Russia and CIS.

ОАО "Вакууммаш" is a high-productivity plant manufacturing a variety of modern vacuum pumps and units for various sectors of the manufacturing industry and agriculture.

Enjoying good manufacturing capabilities, highly qualified personnel, and competent engineers and technicians, the enterprise continuously improves its products and manufacturing processes, is in constant search of the off-beat solutions for production of new equipment. This allows successive competition in the market of vacuum units.

The high level of equipment manufactured by the plant is proved by the continuous extension of the company's foreign economic links. Exports currently accounts for over 40 per cent of its total output.

### **Products:**

Mechanical vacuum pumps and units

Ejectors

Electrophysical ultrahigh-vacuum pumps and units

Vacuum fixtures

Vacuum metallising units

General industrial equipment

Products for agroindustrial complex

Products for motor and agricultural machinery

## **OOO "Freza"**

Limited Liability Company "Freza" was established in 1996. The company's basic activity is the manufacture of dental tungsten carbide cutters for straight hand-pieces and cutter units intended for prosthetic dentistry when machining special alloys, various steels, ceramics, hard plastics, and super plasters.

A wide variety of geometrical forms, sizes, and kinds of cutting surfaces ensure any types of dental operations. Specially fine-dispersed hard alloy used to manufacture the cutters ensure the dense structure of the working portion and guarantee high efficiency and long service life when machining the materials.

Tungsten carbide cutters can also be used effectively to process glass, china, and natural stones in jewellery.

The products of the enterprise are well sold to the CIS (Belarus) and foreign countries (Germany, the USA).

### **Products:**

- Dental tungsten carbide cutters

## **GUP "Zelenodolsk Plant n.a. A.M. Gorky"**

State Unitary Enterprise "Zelenodolsk Plant n.a. A.M. Gorky" was established in 1895. Today, it is a modern enterprise that manufactures ships and vessels of various classes and for different uses, with displacement of up to 7,000 tonnes. For over a hundred years, more than 1500 vessels were manufactured. Among them are barges and paddle steamers, tugboats and fishing boats, refrigerated cargo carriers and high-speed hydrofoil motor ships, speedboats, anti-submarine and patrol ships.

The plant has an up-to-date ship-building complex enabling it to carry out large block assembly of hulls on a building berth, with blocks weighing up to 400 tonnes, while available basin dock provides an opportunity of conducting dock testing of ships and vessels all year round.

The shipyard's capacities along the whole production chain enable the enterprise to manufacture ships and vessels under a rather tight schedule.

### **Products:**

- Sea- and river-going vessels
- High-speed passenger hydrofoil vessels of "Meteor" type
- "Linda" river-going passenger ship on air-cavity
- "Vega" sea-going high-speed passenger ship on air-cavity
- speedboats for various uses
- Sea-river tankers (oil-tankers, bitumen-carriers, etc.)
- Oil spill recovery boats
- Shipboard products

## **GUP "Zelenodolsk Design Office"**

State Unitary Enterprise "Zelenodolsk Design Office" has been engaged in design of ships and vessels for various uses for over fifty years. It enjoys a rich experience in the creation of high-speed vessels, hydrofoil and air-cavity vessels, catamarans and outrigger vessels (of unconventional architecture). Some 800 vessels were built based on designs from the Zelenodolsk Design Office.

The Office has licenses for designing vessels and equipment for oil-and-gas complex; it is registered in Germanischer Lloyd; its designs have certificate of the Russian Federation Maritime Register. In the nearest future the Office will complete the introduction of ISO-9000 quality system. The Office has obtained the State accreditation in compliance with the Federal Law "On Science and State Scientific-and-Technical Policy".

### **Services:**

- Design of ships and vessels for various uses

## **OAO "Kazan Optical-Mechanical Plant"**

Open-End Joint Stock Company "Kazan Optical-Mechanical Plant" (KOMZ) is one of the leading Russia's enterprises in optomechanical and optoelectronic industries.

OAO "KOMZ" manufactures a wide range of consumer products (binoculars, sights, vision tubes), as well as devices for science and research (spectrographs, spectrum analysers, refractometers, polarimeters, interferometers, etc.), devices for industrial uses (industrial endoscopes, microfilming equipment, copying/duplicating machines), and medical equipment.

OAO "KOMZ" also manufactures products for all combat arms: air force, artillery, naval forces, frontier troops, land forces, and military space forces.

In addition to supplying existing devices, OAO "KOMZ" is also capable of designing tailored versions under customer's requirements specifications.

### **Products:**

- Day-time binoculars and monoculars, 5, 7, 8, 10, 12, and 15-times magnification
- Night-vision devices of 1, 2, and 2+ generation
- Monocular and binocular telescopes
- Microscopes
- Laser range finders
- Photographic objectives
- Sights, optical hunting, collimator, night-vision, for rifled and smooth-bore guns

## **OAo "Zavod - Elecon"**

Open-End Joint Stock Company "Zavod - Elecon" is the leading enterprise of electronic industry. The history of the enterprise goes back to 1939. Originally, the small plant was involved in the manufacture of heat exchangers; during the World War II, it worked as a military enterprise; in 1950, it became the first plant in the country to master the manufacture of electric connectors.

Today, OAo "Zavod – Elecon" has modern production facilities and highly skilled specialists.

### **Products:**

- Electric connectors of various kinds and types for aviation, space technology, communication equipment and telemechanics, rectangular connectors for household radio electronics and special connectors
- Discontinuous units for aircraft, ships, missiles, and space technology
- Radio engineering equipment for aviation and space technology
- Lighting devices: halogen, luminous and incandescent
- Stop valves
- Water valves DU15 - DU50 and gas valves DU15, DU20
- Valves DU50, DU80, DU100
- Disk shutters DU-65
- Brass fittings DU15 for metal-plastic pipes
- Ball cocks DU15, DU20, DU25
- Scale models (1:43) of KamAZ, Ural, ZiL and MAZ trucks
- Art castings
- Consumer goods.

## **GUP Kazan Plant "Elektropribor"**

State Unitary Enterprise Kazan Plant "Elektropribor" is one of the Russia's oldest aeronautical engineering enterprises. The factory is engaged in the production of a wide range of instruments and systems applied at all types of aircraft engines, airplanes, and helicopters of Russian and CIS manufacture.

Apart from aviation products, the plant manufactures some 40 items for industrial and domestic uses.

The company is the official supplier of completing parts to KamAZ trucks (electrical speedometer gauges), OKA compact cars (ignition coils, cylinder gears, door locks, auto switches).

"Elektropribor" has an international reputation of reliable partner, exporting products to many countries and assisting foreign companies in mastering the production and in production of licensed products.

The factory is a co-funder of a Russian-French joint venture company engaged in the development and production of temperature, RPM, and pressure sensors for aviation.

### **Products:**

- Autopilot systems and airplane automatic control systems
- Gyroscopic platforms
- Systems and sensors for measuring, regulation, transformation, and control of engine temperature and RPM
- Fire alarm systems and detectors responding to the temperature change speed and automatically turning on the fire-extinguishing means
- Airplane fuselage and wings icing alarm systems and detectors
- Remote transmission elements operating in indicator or transformer modes, DC electric motors with built-in reducers
- Wide range of thermocouples
- Various electronic equipment

## **ОАО "Тателектромаш"**

Open-End Joint Stock Company "Тателектромаш" was established in 1976 in the city of Naberezhnye Chelny. The production was launched in January 1981.

Today, ОАО "Тателектромаш" is a modern enterprise that incorporates tens of workshops of the main factory and four independent enterprises that have developed and manufactured a wide range of products for seventeen years.

ОАО "Тателектромаш" manufactures electric drives for "BelAZ" heavy-duty dump trucks used at ore mills that extract strategic raw materials and precious metals.

Most metallurgical plants of the country operate electromagnets of high lifting capacity manufactured at the enterprise. These magnets are also in demand among foreign companies.

High technological level of developments, up-to-date technology and relevant equipment enable the enterprise to manufacture high-quality products. ОАО "Тателектромаш" is among 5,000 leading Russian enterprises and has the status of the "Leader of the Russian Economy".

### **Products:**

- Traction electric motors, generators and start-adjusting equipment for heavy-duty dump trucks
- Traction motors and starting regulator equipment for municipal electric transport
- Electric motors for cranes, electromagnets of high lifting capacity
  - For metallurgical, mechanical and repair plants
  - Electrical equipment for railway bays
- Consumer goods

## **OAO "Radiopribor"**

Open-End Joint Stock Company "Radiopribor" is a complex of specialised production facilities featuring high capacities and intellectual potential engaged in development and large-scale production of special integrated devices. Radiopribor co-operates with all leading firms of the CIS in design, production and servicing of airborne systems, industrial automated products, computing and control systems based on microprocessors, and special-purpose computing systems.

The company enjoys up-to-date manufacturing and technological base that enables it to make products meeting the latest requirements applicable to radio-electronic devices.

### **Products:**

- Microprocessor controllers
- Microprocessor set of control tools
- Microprocessor devices to control the oil-gas boiler burners
- Temperature transmitter units
- Actuating mechanisms:
  - MEO-86
  - MEO -87
  - MEP-2500
  - MEP-2500-II-VT4
  - MEP-6300-II-VT4
- FC thyristor amplifiers
- Coupling bands
- Audible reverse alarm
- All-wave active antenna

## **ОАО Алметьевск Plant "Radiopribor"**

Open-End Joint Stock Company Almetьевsk Plant "Radiopribor" was established in 1967. Today, the enterprise is a member of the Russia's Aerospace Equipment Corporation.

The plant holds monopoly in Russia in the field of production of antenna feeder systems for aircraft industry. Over the past few years the enterprise has been a permanent participant of aircraft-related exhibitions at home and abroad.

Under the Conversion Programme, the enterprise has developed and mastered the production of a number of consumer goods: receiving equipment for radio and television, woodworking machines, washing machines "Gouzel", household water purification filters "Chishma", metallic cabinets and boxes for electric switches and fittings.

The enterprise has developed and started the production of a wide range of ground-based and underground electronic devices for oil-gas industry used to control and optimise the operating modes of power mechanisms, engines, and pumps.

In 2001, the enterprise was successfully certified in accordance with ISO 9002 quality standard.

### **Products:**

- Antenna feeder systems for aircraft industry
- Receiving equipment for radio and television
- Woodworking machines
- "Gouzel" washing machines
- Household water purification filters

## **OAO Chistopol Watch Factory "Vostok"**

The history of Open-End Joint Stock Company Chistopol Watch Factory "Vostok" starts back in 1942 when one of the Moscow watch-making plants was evacuated from Moscow to a little town located on the Kama River.

Right after the end of the World War II, the factory started the production of mechanical wrist watches - its main production item ever since.

In 1965, the company was appointed an official supplier of watches for the Defence Ministry of the Soviet Union. This year marks the creation of the world-famous 'Komandirskie' ('Commander') watch.

Success of the professional watches determined the company's future path of development - to create mechanical watches maintaining precise timekeeping at any temperature, in any environment, surviving heavy pressure and blows.

In 1996, the cooperation between the factory and US-based "Capital Trading" company resulted in starting the production of a new generation timepiece combining the appearance that corresponds to the world's latest watch-marking trends and is provided by the foreign partner and the traditional reliable clockwork from Chistopol.

The results of work of Chistopol watchmakers were marked by a dozen of international and Russian diplomas and prizes.

Apart from mechanical wrist watches, the factory also manufactures various instruments and devices. Among them are ship's clocks, car clocks, elapsed time meters, clock drive mechanisms, impulse counters, tachometers, manometers, water meters, registers to water meters. All these products have an excellent reputation among the consumers.

### **Products:**

- Wrist watches
- Car clocks
- Ship's clocks
- Tower- and street-clocks
- Water meters
- Impulse counters
- Tachometers
- Manometers

## **OAO " ICL-KME CS "**

Open-End Joint Stock Company " ICL-KME CS " was established in 1991 by the Kazan Manufacturing Enterprise of Computer Systems (KME CS) and UK-based International Computers Limited (ICL).

OAO "ICL-KME CS" currently incorporates 6 scientific and technical centres, Production and Commercial Centre, Centre for Regional Projects Support, offices and service centres in Moscow, Astrakhan, Surgut, Volzhsk (Mari El), Naberezhnye Chelny, Bugulma, Kukmor, and Chistopol.

Today, OAO ICL-KME CS is one of the leading systems integrators in Russia.

Besides, ICL-KME CS produces computers ranging from low-end personal computers to high-end servers intended for large-scale corporate IT systems delivered by ICL-KME CS both for state and commercial sectors. The components from the leading manufacturers are used to assemble computers. All produced computers have the RF Gosstandart (State Committee for Standardisation and Metrology) certificates.

### **Services:**

- Project design and building of WAN/LAN, corporate telecommunication systems and structured cabling systems including ISDN-based networks
- Automation of business management in accordance with MRP II / ERP standards
- Data protection against unauthorised access in software and hardware, telecommunication systems, computer networks and media
- Development of application software, both off-the-shelf and customised, implementation and support of information systems
- Implementation and support of finance management and accounting systems for all businesses and organisations regardless of property category and structural organisation
- Production of servers and personal computers
- Implementation of innovative wholesale and retail technologies using POS terminals, bar-coding and plastic cards
- Delivery of hardware and software of the world's largest manufacturers
- Training of top executives and middle managers in methods of business management in accordance with MRP II/ERP standards

## **OAO "Zelenodolsk Plywood Factory"**

Open-End Joint Stock Company "Zelenodolsk Plywood Factory" was established in 1898. Today the factory is specialised in the production of birch-tree plywood of FK brand. The environmentally sound plywood complying with E-1 emission class is manufactured from birch-tree. High physical and technical properties and fine texture of the plywood ensure its use in many industries, including aircraft building and production of musical instruments. The annual output of the company is 42,000 cubic metres. The clients of the Zelenodolsk Plywood Factory include large companies from Russia and the CIS, England, Austria, the USA, Germany, France, Poland, Slovenia, Italy, Egypt, Hungary, India, etc. Well-established transportation links of the company (rail-, motor- and waterways) enable it to deliver its products in the shortest possible time.

### **Products:**

- Plywood
- Crude veneer
- Resin

## **AOR NP "Povolzhsky Plywood and Furniture Works"**

Workers' Joint Stock Company (People's Enterprise) "Povolzhsky Plywood and Furniture Works" is one of the leading enterprises in the region to manufacture furniture, plywood, synthetic resins, cross-band and rotary-peeled veneer, saw timber and products made of wood waste.

The company is a reliable partner that produces high-quality products well known on international market and has a rich experience in exporting its products to foreign countries.

The geography of the plant's exports is as follows:

Plywood: the Netherlands, the USA, Egypt, Italy, Slovenia, Croatia, Spain, Germany, and England.

Furniture parts: Germany.

Furniture: Sweden, Denmark, France, Germany, Austria, the Netherlands, the USA, Canada, and Poland.

The company has elaborated a long-term programme embracing all stages of production, starting from procurement of raw materials to recovery of forest vegetation, deeper processing of plywood products and, hence, the manufacture of more complicated articles of furniture to be supplied to West European countries and Russia.

The main task of the company is to manufacture competitive products that would meet high international quality standards.

### **Products:**

- Plywood
- Synthetic resins
- Furniture
- Cross-band veneer
- Saw timber
- Products out of wood waste

## **ОАО "Татхимфармпрепараты"**

Open-End Joint Stock Company "Татхимфармпрепараты" is one of the largest manufacturers of proprietary medicines and the only Russia's producer of catgut.

The company's history goes back to the 19th century when Ferdinand Grache, Master of Pharmacy, opened a drugstore in Kazan. Today, ОАО

"Татхимфармпрепараты" is a well developed industrial complex capable of producing over 400 million proprietary medicines and 60 million running metres of stitching surgical materials a year. The enterprise enjoys stable development: over the last 5 years, the output has nearly doubled, and the range of products grows constantly. The company co-operates closely with many domestic and foreign firms and research institutes, and its products are famous for their quality.

### **Products:**

- Medicines in tablets, ointments and ointment bases
- Stitching surgical materials
- Resorbable: biological, synthetic
- Nonabsorbable: synthetic, polyesters, from natural raw
- Products for medical uses

## **Light Industry**

## **OAO "APK Kazansky Len"**

Open-End Joint Stock Company "Kazansky Len" Agroindustrial Corporation today is a largest and modern enterprise in the Volga region having a complete production cycle: from raw material (flax, jute, ambary hemp, and cotton yarn) to finished products such as single and twisted yarns, specially impregnated fabrics and products thereof, non-woven materials, etc.

The products of OAO "APK Kazansky Len" are in good demand among the customers. Twisted yarns of Kazansky Len are readily bought by carpet-weaving factories. The excellent heat-insulating and noise-absorbing properties of needle-punched fibre are indispensable for automotive industry and construction, including individual building. The Kazan's tarpaulin fabrics impregnated with flame retardant and waterproof compounds are used for production of reliable working clothes for builders, oilmen and chemical industry workers. Packaging fabrics are always in demand among furniture-makers, and the finished waterproof covers are a must for transporting and storing the agricultural produce.

### **Products:**

- Linen flax fabrics
- Tarpaulin
- Flax canvas
- Gauntlets
- Tarpaulin products
- Welders' clothes
- Flax cord
- Impregnated tarpaulin fabrics (waterproof and flame retardant)

## **OAO "Melita"**

Tatar Fur Trade & Industrial Open-End Joint-Stock Company "Melita" is one of the largest Russian enterprises having an over fifty years of experience in tanning and production of ready-made goods out of sheepskin and various furs.

The history of the enterprise is rooted in artisan fur undertakings established in 1928.

To ensure the high quality of its products, OAO "Melita" applies chemicals and newest technologies of the leading German, Swiss and Italian firms such as Henkel, BASF, Stockhausen, Bohme, Sandoz, Francetich.

The mastership of stylists, designers, and production engineers of OAO "Melita" and cooperation with a well-known modeller from Moscow, Irina Krutikova, enable the enterprise to produce a wide range of goods, starting from warm casual wear and special garments to collection models that meet diverse and exquisite tastes of its customers.

The products of OAO "Melita" were many times awarded diplomas and medals at international exhibitions and congresses.

### **Products:**

- Fur articles
- Headgear
- Collars
- Sheepskins
- Special wear
- Fur gauntlets
- Washed wool
- Ladies' leather coats
- Fur covers for car seats
- Fur stockings and socks
- Semi-finished sheepskin materials for footwear

## **GUP RT "PO Tatspirtprom"**

Vodka has been produced on the land of Tatarstan for many centuries. The spirit used for vodka production is made of whole grain carefully grown by human hands. The unique nature of Tatarstan makes our vodka pure and smooth.

State Unitary Enterprise of the Republic of Tatarstan "Production Association Tatspirtprom" incorporates 14 alcohol plants and distilleries of the Republic. "PA Tatspirtprom" today has facilities to produce 12.7 million decalitres of vodka and alcoholic beverages and 4.0 million decalitres of ethyl alcohol per year.

While sticking to old traditions, "PA Tatspirtprom" undertakes a continuous modernisation of its facilities including the installation of the latest equipment.

The range of goods manufactured by the enterprises of the Association numbers over 100 items from low-alcoholic beverages to strong liqueurs and vodkas, many of which were awarded diplomas and prizes at Russian and international exhibitions.

All products manufactured by the enterprises of the Association undergo strict quality control and are certified by the RF Gosstandart within the GOST R certification system.

### **Products:**

- Regular vodkas and special vodkas
  - Based on "De Luxe" alcohol
  - Based on "Extra" alcohol
  - Based on high class purification alcohol
- Balsams and bitter nastoykas
- Low alcohol liqueur and vodka products
  - Low alcohol nastoykas
  - Nalivkas
  - Dessert drinks
  - Wine drinks
  - Liqueurs
- Still wines
- Sparkling wines
- Low alcohol drinks
- Souvenir products
- Ethyl alcohol
- Nutrient yeast
- Distillers dried grains

## **ОАО "Red East"**

Open-End Joint-Stock Company "Red East" is one of the largest enterprises of food-processing sector in the Republic of Tatarstan.

The brewery was established in 1892 by Russian merchant Alexandrov. In 1993, the Kazan Brewery was privatised and transformed into the Open-End Joint Stock Company "Red East". For over a hundred years of its operation a small brewery grew into a high-capacity industrial undertaking with complete production cycle.

All reserves and assets of the plant work to satisfy the customers' requirements and produce high-quality competitive products.

The brewery is persistent in improving the range and quality of its beers, as well as its recipes, inventing new competitive brands of beer and non-alcoholic beverages. Today, the plant produces all in all 15 brands of beer with density between 11% and 18%.

### **Products:**

- Beer
- Non-alcoholic beverages

## **Holding Company "Tatarstan Sote"**

Holding Company "Tatarstan Sote" was established in May 1994. The company incorporates 38 joint-stock daughter companies, of which 35 produce dairy products. Annually, they process 700.000 tonnes of milk supplied from ecologically sound districts of the republic. Over half of milk is used for production of a wide range of butter products.

Highly automated equipment enables the enterprise to produce high-quality sterilised products in dispensable package under aseptic conditions. The products have long shelf life, which makes it possible to supply them to consumers in the entire territory of Tatarstan and beyond its borders.

The wide range of goods supplied by the Holding Company "Tatarstan Sote" and their high quality make the Republic of Tatarstan one of the leaders in the field of dairy products processing in Russia.

### **Products:**

- Dairy products
- Casein
- Lactose
- Dried skimmed milk

### **Yelabuga Motor Works**

Yelabuga Motor Works is involved in some 40 activities, including metal working, construction, cargo and passenger transportation, communication services, publishing and advertising, design and exploration work, production of building materials, hotel and tourist services.

Machine Tool Building Plant operated on the industrial site of GUP RT "PO YelAZ " manufactures components and spares for automotive vehicles, equipment, components and spares thereto for oil producing industry; sophisticated special equipment on automobile chassis for oil producing industry, agricultural sector and timber industry.

Machine Tool Building Plant is certified to ISO 9002 and performs all operations in compliance to this Quality Management System.

Production Servicing Centre manufactures building materials, including joinery and glued wood blocks, foamed and ready-mixed concrete, paving flags, and performs installation, start-up and adjustment of processing equipment and plumbing and heating facilities.

" YelAZ " today is a member and a founder of NAPAK (National Association of Automobile Components' Producers) created in Russia in 2001 with an aim to render assistance in the creation of new facilities.

"YelAZ" company enjoys successful cooperation with Russian automotive companies in delivery of spare parts, assemblies and completing parts for VAZ, GAS, and KamAZ vehicles.

### **OOO "D Plast Eftek RT"**

The joint production was established by Yelabuga Motor Works and Vulkanplast of Czechia in 1999.

The basic products are protective anticorrosion automotive mastics based on PVC plastisols applied on the bottom of vehicles and on welding seams.

OOO "D Plast Eftek RT" was certified in 2001 to GOST R ISO 9002:1996, and in December 2002 in was certified to GOST R ISO 9001:2001.

### **OOO "Automaster"**

In February 2000, OOO "Automaster" launched the manufacture of special machinery on the automobile chassis ("KamAZ", "ZIL" and "GAZ", trailers, semi-trailers, and imported vehicles), such as box body trucks, dump trucks, garbage-removal trucks and other special machinery.

### **OOO "ScanTat Alabuga"**

OOO "ScanTat Alabuga" manufactures large city buses and international-standard tourist buses. The ScanTat bus 5226 "Bars" is assembled on the chassis of KamAZ

-5297 with diesel engine VOLVO PENTA (EURO-2) rated at 203 kW and automatic gearbox manufactured in Kazan by Voith-KMPO.
